

Liquid Vacuum Tanker Collection System

Instant Waste Management's liquid vacuum tankers are authorised to remove liquid waste from commercial, industrial, retail and domestic traps, tanks, pits and wash down facilities.

- Instant Waste Management is able to remove all categories of controlled liquid waste listed on the Department of Environmental Regulation (DER) category listing.
- We offer two options for liquid waste removal:
 - Our tanker arrives on site and removes the controlled liquid waste from the trap, pit or tank
 - We provide a 1000 litre IBC on site and once full either pump-out on site using a tanker or remove and replace the IBC using our DER registered HIAB vehicle.
- Our tankers are DER registered bulk transport vehicles and range from 5,000 and 12,000 litres capacity.
- The controlled liquid materials we are able to transport using our tanker fleet include:
 - Grease Waste
 - Septic Waste
 - Oil/Water Mixtures
 - Storm Drain Waste
 - Industrial Waste Waters
 - Oil Interceptor Waste
 - Sludge/Waste Water Mixtures

Waste assessments, audits and reports can be provided to ensure the optimum waste solution is provided and your waste targets are met.

Our experienced, qualified and DER registered personnel can safely remove waste from site and securely transport the liquid waste to a DER licensed disposal facility.

Controlled Waste tracking documentation can be provided to confirm the waste has been disposed at a registered waste disposal site.

Waste sustainability in action.

Our large liquid vacuum tankers can safely transport a range of liquid wastes from your site.

Our smaller liquid vacuum tanker trucks provide better accessibility within restrictive areas.

Smaller liquid tankers can access tighter spaces.

We have a wide range of different waste trucks to suit your various waste service needs.

WHY CHOOSE US?

Instant Waste Management is a reliable and trustworthy waste partner. Our experience enables us to cater for all waste projects quickly and efficiently. We provide an extensive fleet of vehicles and a comprehensive range of bins, as well as utilise the latest collection and waste management processes. Our state-of-the-art Material Recovery Facility (MRF) helps customers reduce, reuse and recycle materials for a total integrated waste solution.

OUR COMMITMENT

We can customise packages to meet all waste stream requirements. We target cost efficiency, environmental optimisation and resource recovery to provide the best available customer service; all of which leads to a longer term and mutually successful relationships.

SUSTAINABLE WASTE MANAGEMENT

Our approach is designed to deliver key benefits to you – starting with waste assessments through to the collection, separation and recycling of all your waste streams. Our technology, experience and operational techniques ensure the minimum amount of waste is produced, diverting it away from landfill, lowering your bottom line and creating a positive environmental impact.

Waste matters to us. With our help, you'll meet all your sustainable commitments for the safe and effective management of waste. Make Instant Waste Management your waste partner of choice.
