

# Paper & Cardboard

## Recycling System

Paper and cardboard are two of the simplest products to recycle. We help our customers turn their waste paper and card into recyclable material, so it doesn't end up in landfill. As part of our 'Waste Sustainability in Action' initiative, we're working with environmentally-conscious businesses like yours to reduce paper waste, divert used paper and cardboard from landfill and increase resource recovery.

- We provide colour-coded 60L, 120L and 240L recycling bins, secured bins, compactors and other specialised processing equipment to use on your site for all types of waste paper streams.
- When the bins are delivered to a recycling facility, they're screened, sorted and baled into different streams for reprocessing into new paper and cardboard products.
- For large jobs such as office refurbishment or the clearing out of archives, we can provide mixed-use skip bins. Any paper and packaging is separated from the waste stream using the air separation system at our Material Recovery Facility (MRF) and can then be used as a resource for the Waste to Energy sector.
- If your business produces a large volume of paper waste, we can supply on-site compactors.
- These services are ideal for major retailers, printers, publishing houses, financial and legal institutions, and any office with a high paper turnover. Even if your business is largely paper-free, we can make sure that any paper and card that does get discarded is saved and recycled.
- To help you with your waste management targeting and recycling rates, we can provide comprehensive waste planning, regular collection scheduling and audit reports to suit your requirements.
- When you recycle paper and card, you'll help towards reducing landfill disposal rates, virgin tree felling, air and water pollution, greenhouse gas emissions and most importantly recover resources which can be reused to produce environmentally-friendly paper products.

WASTE MANAGEMENT

*Waste sustainability in action.*

With our extensive fleet of vehicles we can cater for all types of waste streams.

Bins can be delivered to your site by rear lift and front lift compaction trucks.

Source separated paper and cardboard is kept secure in a locked bin.

*We have a wide range of different waste trucks to suit your various waste service needs.*

# Specifications

Instant Waste Management has a wide range of front and rear lift collection services on offer. For further information or to place an order, please contact our experienced WA-based team who will be happy to find the best option for your waste requirements.

## ACCEPTED PRODUCTS\*

- Computer printouts
- Letterhead and envelopes
- Writing paper
- Computer reports
- White forms
- Magazines and newspapers
- Manila folders
- Cardboard
- Coloured paper
- Phone books
- Fax/photocopy paper
- Reports (stapled)
- Binder dividers

\*NO laminated items are acceptable.

## VEHICLE SAFETY FEATURES

- On-board reversing camera
- Heated external mirrors
- Reversing lights and beepers
- Dual positioned hazard lights
- Rotating flashing beacons

## CONTAINER OPTIONS & ACCESSORIES

- Plastic and steel lids
- Padlock and chains
- Rubber wheels
- Sloping fronts
- Castors and carts

## BIN SPECIFICATIONS

Capacity	Rear Lift				Front Lift		
	120L	240L	660L	1100L	1.5m <sup>3</sup>	3.0m <sup>3</sup>	4.5m <sup>3</sup>
Depth	0.620m	0.715m	0.765m	1.070m	0.905m	1.505m	1.800m
Width	0.540m	0.580m	1.360m	1.360m	1.810m	1.810m	1.810m
Height	0.920m	1.075m	1.235m	1.485m	0.930m	1.200m	1.400m

Bins sizes are approximate. Bins have tapered dimensions, these are measured between the longest points, due to the splayed shape of the bins.

## REAR LIFT COLLECTION

Best suited for sites with restricted access. Multiple smaller bins and containers can be positioned and emptied into the vehicle and compacted inside prior to transportation.

## FRONT LIFT COLLECTION

Best suited for sites with large amounts of recyclable waste. Large metal containers are lifted and automatically emptied into the vehicle and compacted prior to transportation.

## WHY CHOOSE US?

Instant Waste Management is a reliable and trustworthy waste partner with the experience and capability to be able to cater to all waste projects quickly and efficiently. We provide an extensive fleet of vehicles and a wide range of bins, and we use the latest collection and waste management processes. Our state-of-the-art Material Recovery Facility (MRF) helps our customers reduce, reuse and recycle materials for a total integrated waste solution.

## OUR COMMITMENT

We can customise packages to meet all waste stream requirements. In all of our solutions, we target cost efficiency, environmental optimisation and resource recovery to provide the best available service in waste management and build long-term, mutually beneficial relationships with our partners.

## SUSTAINABLE WASTE MANAGEMENT

Our approach is aimed at delivering key benefits to you – starting with our account management interface, through to monthly reporting, waste audits and planning. We employ our technology, experience and operational techniques to create a cost-effective, environmentally beneficial waste management solution by diverting waste from landfill and extracting recyclable materials.

Join us in the success of 'Waste Sustainability in Action' and make Instant Waste Management your waste partner of choice.
