

Event Services

Collection System

The planning and organisation required to plan large crowd events such as concerts, sporting matches, and cultural events can be overwhelming. With a proved track record in event waste management, we can tailor a package to suit your event's waste requirements and manage everything efficiently and safely. We can arrange to deliver bins to site prior to the event and remove them as soon as practical after the event.

Event Waste Management Plan

Services provided in five easy steps:

Step 1

Discuss the event's needs with one of our experienced team members (we will want to know size of the event, dates, location point/s, and other site or event related issues).

Step 2

We will develop a waste management solution specific for the event, including bin quantities, bin placement, collection timeframes, and budget.

Step 3

Deliver bins to site prior to the event and make available a contact officer should there be a need to contact us in the event of an emergency.

Step 4

Service bins (if relevant) during the course of the event during agreed service times.

Step 5

Post event- remove bins from the event location/s as soon as practical.
